This 30-minute parent education session will focus on a behavioral procedure known as Behavior Momentum. Parents will expand their skills to include a behavioral tool is used effectively in our schools and is appropriate across all age groups. Each participant will leave the session with the tools to increase the likelihood of your child complying with requests and do something they feel is difficult, non-preferred, or complicated. The procedure you will be taught can be used when you anticipate or experience push back or challenging behavior from your child but also in everyday situations where you want to increase your child's confidence and likelihood of success.

This session is facilitated by Ryan Dixon, M.S., BCBA, a current employee of the Tuolumne County Superintendent of Schools. Mr. Dixon's experience includes over ten years of Applied Behavior Analysis and Early Intervention serving students with disabilities and severe challenging behavior.
