

**JAMESTOWN SCHOOL DISTRICT
WELLNESS POLICY
2025 - 2028**

The Jamestown School District is committed to providing a school environment that promotes and protects children's health, well-being and ability to learn by supporting healthy eating, physical activity, general cleanliness, and infection control measures. Therefore, it is the policy of the Jamestown School District that:

- The school district will engage students, parents, teachers, food service professionals, health professionals and other interested community members in developing, implementing, monitoring, and reviewing district-wide nutrition, health, and physical activity policies.
- All students in grade TK-8 will have opportunities, support and encouragement to be physically active on a regular basis.
- Non-Program competitive foods and beverages sold or served at school will meet the nutrition recommendations of the *U. S. Dietary Guidelines for Americans*. Additionally, Non-Program competitive food will not be sold or distributed prior to lunch
- Qualified child nutrition professionals will provide students with access to a variety of affordable, nutritious and appealing foods that meet the health and nutrition needs of students; will accommodate the religious, ethnic and cultural diversity of the student body in meal planning; and will provide clean, safe and pleasant settings and 20 minutes for students to eat.
- To the maximum extent practical, the school will participate in relevant federal school meal programs, such as the School Breakfast Program and National School Lunch Program, including after-school snacks.
- The school will provide nutrition education, health education, and physical education to foster lifelong habits of healthy eating, cleanliness, and physical activity, and will establish linkages between health education and school meal programs, and related community services.
- The school will measure improvement in the health and fitness of its students, which may include the performance of fitness testing, body Mass index, and observable behaviors of lunch contents and physical activity participation.

TO ACHIEVE THESE POLICY GOALS:

The School Wellness Committee will monitor, review, and as necessary, make recommendations for school nutrition, health, and physical activity policies. The Wellness Committee also will serve as a resource for implementing those policies in conjunction with the teacher leadership team and administration. The Wellness Committee will consist of a group of individuals representing the school and community, including parents, the manager of school food services, a school administrator, classified employees and teachers. The Wellness Committee will bring recommendations and policy revisions to the School Site Council, in a public meeting, for input and approval annually.

Nutritional Quality of Foods and Beverages Sold and Served on Campus

School Meals:

Meals served through the National School Lunch and Breakfast Programs will:

- Be appealing and attractive to children
- Be served in clean and pleasant settings
- Meet, at a minimum, nutrition requirements established by local, state, and federal statutes and regulations
- Offer a variety of fruits and vegetables
- Serve low-fat and fat-free milk and/or nutritionally-equivalent non-dairy alternatives (to be defined by USDA).
- Ensure all grains are whole grain rich products
- Provide access to free drinking water during meal times

Jamestown School will engage students and parents in selecting foods through new entrees provided through the school meal programs in order to identify new, healthful, and appealing food choices, which can include vegetarian options. In addition, Jamestown School District will share information about the nutritional content of meals with parents and students (e.g. Healthy recipe of the month, Healthy Corner in Newsletter, MyPlate posters, ect.). When new meal options are introduced to students, Jamestown school will make efforts to gain student feedback about meals in order to inform future meal options.

Such information could be made available on menus, a website, on cafeteria menu boards, visuals in cafeteria placards, or other point-of-purchase materials.

Breakfast: To ensure that all children have breakfast, either at home or at school, in order to meet their nutritional needs and enhance their ability to learn:

- Jamestown School District will operate a Breakfast In the Classroom Program which is a free breakfast program for all students to be provided in the classrooms after the morning bell.
- Jamestown School will notify parents and students of the availability of the free “Breakfast In The Classroom” program at the beginning of each academic year.

Jamestown School District has been approved to run a Community Eligibility Program (CEP) therefore eligible for the Universal Free Meal Program that provides free meals to all children, regardless of income; we will promote the availability of school meals to all students; and/or use nontraditional methods for serving school meals, such as “grab and go” or classroom breakfast, as practicable.

LCFF Alternative Household Income Data Collection Forms will be a required registration document for **every** family member during the annual pre-registration or re-registration process in August. Those who begin later in the school year will be provided information upon enrollment. The district will coordinate the NSLP application process for MediCal Express Enrollment and Direct through a memorandum of understanding with the Tuolumne County Health and Welfare Department.

Meal Times and Scheduling. Jamestown School District:

- Will provide students with at least 10 minutes to eat after sitting down for breakfast and 20 minutes after sitting down to lunch. When possible, recess will follow lunch to provide extra eating time for students who need more time.
- Should schedule meal periods at appropriate times, i.e., lunch will be scheduled between 11 AM. and 1 PM
- Should not schedule tutoring, club or organizational meetings or activities during mealtimes, unless students may eat during such activities
- Should schedule food incentive, recognition, reward parties after scheduled lunch times
- Will provide students access to hand washing or hand sanitizing before they eat meals or snacks
- May take reasonable steps to accommodate the tooth-brushing regimens of students with special oral health needs (e.g., orthodontia or high tooth decay risk).
 - Smilekeepers dental hygiene permission forms are to be distributed to parents via school district registration process.

Qualifications of Food Service Staff: Qualified nutrition professionals who have met the Jamestown School District's job description requirements will administer the school meal programs. The school district will provide ongoing opportunities for professional development for all nutrition professionals in the district. Staff development programs will include appropriate certification and/or training programs, including nutrition and menu/meal planning for all employees connected with our foods service, according to their levels of responsibility.

Sharing of Food and Beverages and Parent Notification: As part of the health curriculum, Jamestown School District will educate students on the dangers of sharing their foods and/or beverages with their peers, especially given concerns about allergies and other restrictions on some children's diets.

Notification: The annual Parent-Student Handbook will include guidance for parents to notify the school of any nutritional or dietary needs related to allergies or religious restrictions. Information to encourage selection appropriate food/beverages to send to school, as well as prohibited food/ beverage items will be included in the Parent-Student Handbook along with school policy notification that prohibited items may be confiscated or students may be asked to place items in their backpack, and a healthy food option will be offered. The handbook will require a parent signature as acknowledgment. The Parent-Student Handbook will be included and distributed in all registration and enrollment packets.

Non-program competitive foods and beverages will not be sold individually by the school (i.e., foods sold outside of reimbursable school meals, such as through vending machines, cafeteria a la carte [snack] lines, fundraisers, school stores, etc.) as per California SB677.

Snacks: Snacks served during the school day or in after-school programs will make a positive contribution to the children's diets and health, with an emphasis on serving fruits and vegetables as the primary snacks, and water or milk as the primary beverage. All regular snacks must be approved by the cafeteria manager or from the approved list of nutritional snacks. Schools will assess if and when to offer snacks based on timing of school meals, children's nutritional needs, children's ages, and other considerations. Nutritional snacks, with all appropriate NSLP nutrition and food components, will be provided to all students who attend the after-school program between the hours of 3:00 and 4:00PM.

The district will disseminate a list of healthful snacks items to all teachers, after-school personnel, and parents; it will be posted on the school website under the cafeteria/ food service page.

- Jamestown School District provides snacks through after-school programs and will pursue

receiving reimbursements through the National School Lunch Program.

Rewards: Jamestown School District will look for and use, whenever possible, alternatives to snack foods, beverages, or candy as rewards for academic performance or good behavior, and will not withhold food or beverages (including food served through school meals) as a punishment. Ice cream can be offered as a reward for specifically scheduled reward activities as approved by school administration, such as perfect attendance or student of the week. Alternative rewards are recommended, such as praise, stickers, character cards and Panther Pride cards, special P.E. time, movies, computer time, etc. An alternative to food rewards will be distributed to all teachers prior to the beginning of each school year, and will be available to all staff members as a resource.

Celebrations: Jamestown School District will limit celebrations that involve food during the school day to no more than one party per class per month, including holiday parties. Each party should include no more than two foods or beverages that do not meet nutritional standards for foods and beverages (e.g. soda, pizza, and cake). Jamestown School District will discourage parents from bringing sugar-based treats to celebrate student birthdays.

School-sponsored Events (such as, but not limited to, athletic events, dances or performances): Jamestown School District will endeavor to offer healthy choices, such as fresh fruits and vegetables, nuts, seeds, jerky, whole grains like popcorn, and beverages such as 100 % juice, water, or milk. Students in grades 6-8 may be offered food and beverages that do not meet the nutritional standards of the National School Lunch Program at any evening dances scheduled for the year.

Fundraising foods: Any fundraising that involves food products must be delivered to students at the end of the school day to be taken home. If fundraising food products do not meet the nutritional standards as outlined in this policy, they may not be sold to students during the school day.

Food from home: All food that is brought from home for the consumption of other students (e.g. *holidays, class parties*) must be store-bought or prepared in a commercial kitchen with servesafe certification. It is important that parents are aware that some students may have allergies to certain foods, especially peanuts, and to check with the classroom teacher before delivering and disseminating food items. High sugar and highly caffeinated drinks, such as soda, are highly discouraged and are not to be brought to school by students. Energy Drinks are prohibited at school. Food deliveries from fast food are discouraged. Any food deliveries from a third party (such as door dash or another app-based delivery service) are strictly prohibited.

Nutrition and Physical Activity Promotion and Food Marketing

Nutrition Education and Promotion: Jamestown School District aims to teach, encourage, and support healthy eating by students. Jamestown School District will endeavor to provide nutrition education and engage in nutrition promotion that:

- Is offered at each grade level as part of a sequential, comprehensive, standards-based program designed to provide students with the knowledge and skills necessary to promote and protect their health
- Is part of not only health education classes, but also classroom instruction in subjects such as math, science, language arts, social sciences, and elective subjects
- Includes enjoyable, developmentally-appropriate, culturally-relevant, participatory activities, such as contests, promotions, taste testing, farm visits, and school gardens

- Promotes fruits, vegetables, whole grain products, low-fat and fat-free dairy products, healthy food preparation methods, and health enhancing nutrition practices
- Emphasizes caloric balance between food intake and energy expenditure (physical activity/exercise)
- Links with school meal programs, other school foods, and nutrition-related community services
- Includes training for teachers and other staff

Integrating Physical Activity into the Classroom Setting: For students to receive the nationally-recommended amount of daily physical activity and for students to fully embrace regular physical activity as a personal behavior, students need opportunities for physical activity beyond physical education class. Toward that end:

- Classroom health education will complement physical education by reinforcing the knowledge and self-management skills needed to maintain a physically-active lifestyle and to reduce time spent on sedentary activities, such as watching television
- Opportunities for physical activity will be incorporated into other subject lessons
- Classroom teachers will incorporate short physical activity breaks between and within lessons or classes, as appropriate

Communications with Parents: Jamestown School District will support parents' efforts to provide a healthy diet and daily physical activity for their children. Jamestown School District may offer healthy eating education for parents, send home nutrition information, post nutrition tips on school websites, and provide nutrient analyses of school menus. Jamestown School District will endeavor to encourage parents to pack healthy lunches and snacks and to refrain from including beverages and foods that do not meet the nutrition standards for individual foods and beverages. Jamestown School District will provide parents a list of foods that meet the district's snack standards and ideas for healthy celebrations/parties, rewards, and fundraising activities.

Jamestown School District will provide information about physical education and other school-based physical activity opportunities before, during and after the school day; and support parents' efforts to provide their children with opportunities to be physically active outside of school. Such supports will include sharing information about physical activity and physical education through a website, newsletter or other take-home materials, special events, or physical education homework.

Food Marketing in Schools: School-based marketing will be consistent with nutrition education and health promotion. As such, the school district will limit food and beverage marketing to the promotion of foods and beverages that meet the nutrition standards for meals or for foods and beverages sold individually. School-based marketing for brands promoting predominantly low-nutrition foods and beverages is prohibited. The promotion of healthy foods, including fruits, vegetables, whole grains, and low-fat dairy products is encouraged. Schools shall not promote brands or logos inconsistent with healthy nutrition or lifestyle in any building or on equipment. Examples of marketing techniques include the following: logos and brand names on/in vending machines, books or curricula, textbook covers, school supplies, scoreboards, school structures, and sports equipment; educational incentive programs that provide food as a reward; programs that provide schools with supplies when families buy low-nutrition food products; free samples or coupons; and food sales through fundraising activities. Marketing activities that promote healthful behaviors (and are therefore allowable) include: pricing structures that promote healthy options in a la carte lines; sales of fruit for fundraisers; and coupons for discount gym memberships.

Staff Wellness: Jamestown School District highly values the health and well-being of every

staff member and will plan and implement activities and practices that support personal efforts by staff to maintain a healthy lifestyle. We will strive to implement at least two Staff Wellness Events per year (*e.g. rhythm and movement, yoga, fitness challenge teams, Walking Wednesdays, options for social and emotional support, self-care, Step it up April etc...*)

Physical Activity Opportunities and Physical Education:

Daily Physical Education (P.E.) K-8: All students in grades K-8, including students with disabilities, special health-care needs, and in alternative educational settings, will receive daily physical activity for at least 200 minutes every two weeks during the school year. All physical education will be supervised by a classroom teacher who has been trained in physical education activities. An appropriate alternative activity shall be provided for students with disabilities that restrict physical exertion. When a student is injured or ill, a temporary exemption from physical education or a modified program shall be provided.

Daily Recess: All elementary school students will have at least 15 minutes a day of supervised recess, outdoors-except in poor weather, during which schools should encourage moderate to vigorous physical activity verbally and as allowable through the provision of space and equipment. Playground equipment will be provided for student use, and efforts will be made to include structured recess activities and blacktop stenciling to promote physical activity. Jamestown School District discourages extended periods (i.e. periods of two or more hours) of inactivity. When activities, such as mandatory school-wide testing, make it necessary for students to remain indoors for long periods of time, schools should give students periodic breaks during which they are encouraged to stand and be moderately active.

Physical Activity Opportunities Before and After School: Jamestown School District will offer extracurricular physical activity programs, such as intramural programs, or clubs. Jamestown School District will offer a range of activities that meet the needs, interests, and abilities of all students, including boys, girls, students with disabilities, and students with special health-care needs. Jamestown School District will participate in the Tuolumne County Elementary Sports program. After School programs will provide and encourage activities that promote physical fitness. The recommendation is that 25% of the program time shall be allotted for periods of physical activity.

Physical Activity and Punishment: The district will discourage the use of physical activity (e.g. running laps, pushups) or withhold opportunities for physical activity (e.g. physical education) as punishment. The district will strive to maintain the message that physical activity is a positive aspect of wellness.

Safe Routes to School: The school district will assess if necessary, and to the extent possible, make needed improvements to make it safer and easier for students to walk and bike to school. When appropriate, the district will work together with local public works, public safety, and/or police departments in those efforts. The school district will explore the availability of federal “safe routes to school” funds, administered by the state department of transportation, to finance such improvements.

Use of School Facilities Outside of School Hours: School spaces and facilities should be available to students, staff, and community members before, during and after the school day, on weekends, and during school vacations when supervision and custodial service is available. These spaces and facilities also should be available to community agencies and organizations offering physical activity and nutrition programs. School policies concerning health and safety and facility use will

apply at all times.

HEALTH EDUCATION

Jamestown School District will promote healthy lifestyle choices in regards to the impacts of tobacco, vaping, drug and alcohol use. The district will encourage and provide age-appropriate health education curriculum and will facilitate partnerships with community agencies to deliver presentations in these areas.

To monitor and deter the use of tobacco or vaping products on campus, the district has committed to the following:

- Purchased and installed vape detectors in the upper grade restrooms.
- Maintenance of contract with company that checks classrooms in grades 6-8 for drugs and other substances with the use of trained dogs.

Monitoring and Policy Review

Monitoring: The Superintendent will ensure compliance with established nutrition, physical activity, and wellness policies, and will report on the district's compliance to the school board in the School Accountability Report Card. An initial assessment of compliance will be conducted as the policy is implemented. The district will establish implementation priorities and outcome measurements annually, and include, in its report to the school board, progress and next steps on its annual initiatives. The Wellness Committee, School Site Council, and district staff will be included in this process. School food service staff will ensure compliance with nutrition policies within school food service areas and will report on this matter to the superintendents. In addition, the school district will report on the most recent USDA School Meals Initiative (SMI) review findings and any resulting changes.

Policy Review: The School Wellness Committee will meet two times a year for implementation monitoring. The School Wellness Policy will be reviewed at least every three years and amended to comply with local, state and federal law. Current nutrition and wellness information will be integrated into policy revisions.

WELLNESS POLICY APPROVED:

Jamestown School District, School Site Council, April 8, 2025

ADOPTED:

*Jamestown School District Board Approval March 9, 2016, June 12, 2019,
June 22, 2022, May 14, 2025*
